1 Introduction

1.1 About This Report

This report is for the New England Fishery Management Council (NEFMC). The purpose of this report is to synthesize ecosystem information to allow the NEFMC to better meet fishery management objectives. The major messages of the report are synthesized on pages 1-3, with highlights of 2024 ecosystem events on page 4. The information in this report is organized into two main sections; performance measured against ecosystem-level management objectives (Table ??), and potential risks to meeting fishery management objectives (Table ??; climate change and other ocean uses). A final section highlights notable 2024 ecosystem observations.
