0.1 Testing automated captions

This is a test of the automated caption code.

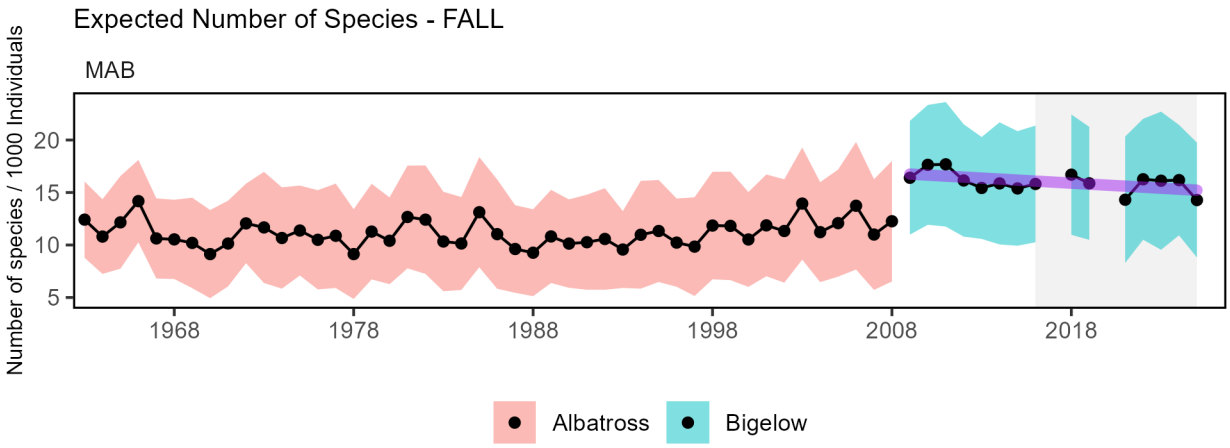

Figure 1: Adult fish diversity in the Mid-Atlantic Bight, based on expected number of species in a standard number of individuals. Results from survey vessels Albatross (red) and Bigelow (blue) are reported separately due to catchability differences. A long-term significant decrease is present in the Bigelow time series (purple). MAB - ALBATROSS: 2008, near average. No long-term trend (p = 0.391). No short-term trend (p = 0.268). MAB - BIGELOW: 2025, below average. No long-term trend evaluated. No short-term trend (15 years, p = 0.184).
